

Australian Network for Plant Conservation
presents a workshop on
**REHABILITATION AND MANAGEMENT OF
DISTURBED NATIVE VEGETATION**

Dubbo, 25-26 October 2005
Western Plains Zoo, Obley Road, Dubbo, NSW

Are you involved in the rehabilitation of native vegetation?
Does your work-site include native vegetation that you need to manage
or rehabilitate? Do you participate in local rehabilitation projects?
Are you interested in reversing the decline of native plant communities
in your area? Then this workshop is for you!

Workshop focus:

The knowledge and skills required to undertake ecological rehabilitation and
management of disturbed native vegetation.

Themes include:

- NSW vegetation legislation essential for rehabilitation practitioners and projects.
- The ecological principles essential to planning a rehabilitation project.
- Applying the principles to actual rehabilitation projects (case studies, workshop activity, site visits, techniques).
- Understanding the task (assessing site condition, the goal for the site, planning, issues such as conservation genetics, provenance, soil-symbionts, monitoring and ongoing management).

The workshop will be a mix of presentations by experienced rehabilitation practitioners and visits to selected field sites. Participants will expand their skills and knowledge, challenge preconceptions, exchange ideas and expertise, work with experts and broaden networks.

Workshop fee (incl catering, field trip, Plant Conservation Techniques manual on CD & GST):

ANPC member: \$165 *Concession: \$75
Non-member: \$185 *Concession: \$95

* Concession for volunteer community group members,
full-time students, pensioners.

Registrations close: 14 October 2005 (needed for planning, catering, bus hire). **Get in quick!**

Accreditation: Participation in ANPC workshops can now contribute to Conservation and Land Management qualifications. Cost \$25 (incl GST). More information available on request (and on ANPC website).

Photographs (top to bottom): Everlasting (*Xerochrysum viscosum*) with flowers and seed at a rehabilitation site; Ian Davidson and Tracy Michael assessing a site for rehabilitation; *Hardenbergia violacea* on white box trunk in a rehabilitation site.
