# *Eucalyptus 2* by Goo

There are lots of fun activities in this booklet - all centred on the Eucalypt Lawn.

Please stay on the lawn and paths. And pick up only dead leaves, bark and fruits from the lawn.

Collect some bits of leaves, bark and gum nuts that interest you - perhaps because the leaves have been nibbled or show dots. Arrange the bits into a frame around your magic eucalypt book.

Here are some rules you need to keep in mind:

## Find me. Where am I?

I'm a gum tree and I'm somewhere on the Eucalypt Lawn. Here's a picture clue to help you.

Can you find me too?

...and me?

## Eucalypt Treasure Hunt

- Collect some gum bark from the ground – a piece that's smooth, another rough, one soft and one hard. You might like to take them home and glue them to cardboard and make a frame for a small picture.
- Find the fattest tree.
- Collect a series of twigs from very thin to as thick as your thumb. You might glue them in your picture frame too.
- Look carefully and see if you can find a little animal living on a gum tree.

## Take home, draw and colour

Choose a favourite gum tree nearby. Look carefully and work out what else trees might give us. Later add them to your picture and colour it.

## Find and count.
